Pedro Meyer

- 17 years in music
- Multi-instrumentalist
- Songwriter
- Producer

pandora[®]

last.fm music

Have you ever heard of...

Spotify

amazon music

They all recommend music based on...

- User Ratings
- Similar Artists
- Similar Styles
- Similar Genres
- etc....

**But what if we
had more
control over our
recommenders!?**

End Goal

The goal is to create a recommender where the user can input lyrics and acoustic data to get more customized song recommendations.

Gives users value in the form of:

- Inspiration
- Insight on their creative process
- Comparison with other artists

Workflow

Raw Database

- 28372 songs
- Features include:
 - Acoustic Features
 - Lyrics

Natural Language Processing

- Sort lyrics into topics using Natural Language Processing (NLP)
- Use topics as features for recommendations

Recommender

- Compare final feature dataset with user input
- Give recommendations

Features

「 The Data - Acoustic Features 」

Acousticness	Danceability
Loudness	Valence
Sadness	Speechiness
Tempo	Energy
Instrumentalness	Mode

Instrumentalness	Mode

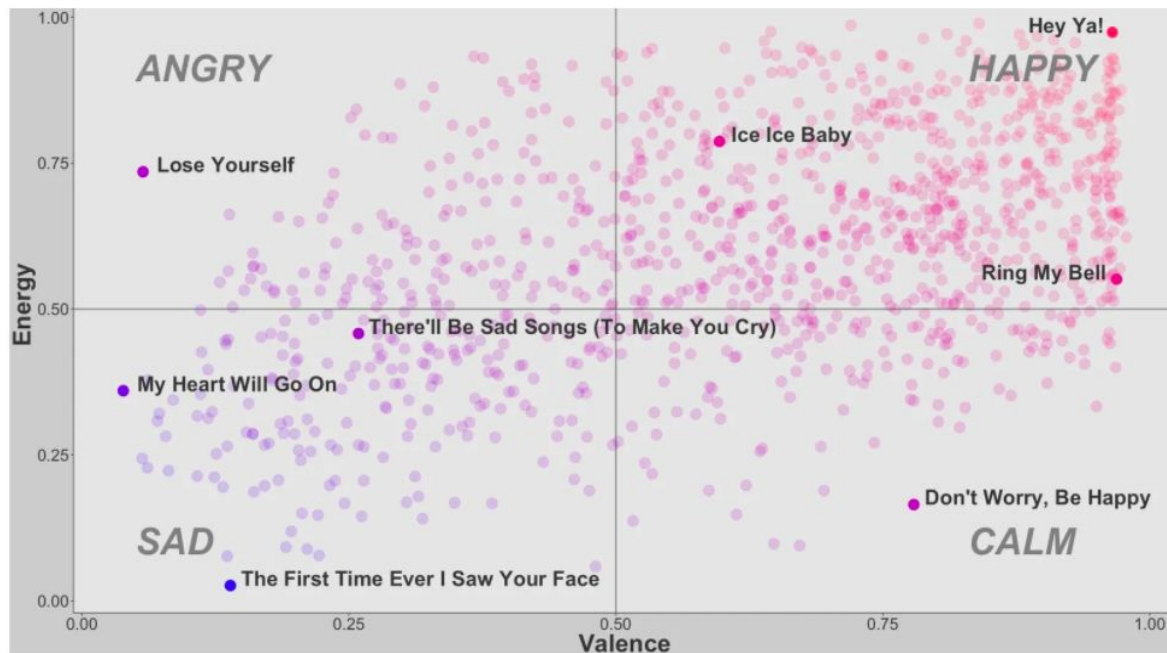

Sadness Feature

Valence:

Describes the musical positiveness conveyed by a track.

Energy:

Represents a perceptual measure of intensity and activity. Typically, energetic tracks feel fast, loud, and noisy.

[Credit: Miriam Quick. Data source: Spotify, extracted using spotifyr. 1,080 tracks that reached number one on Billboard Hot 100, July 1958 to April 2018, incl double A sides]

*This beta version gives user an idea of what to input.

Recommender Output

Thickfreakness By The Black Keys

2003 - Blues

'Here I am darling And I'll care for you, hey that's
all I want to do / hold me, love me, in your heart / and
I'll hold you near and I'll whisper in your ear / I'll
take your hand and I'll make you understand / hold me,
love me in your heart'

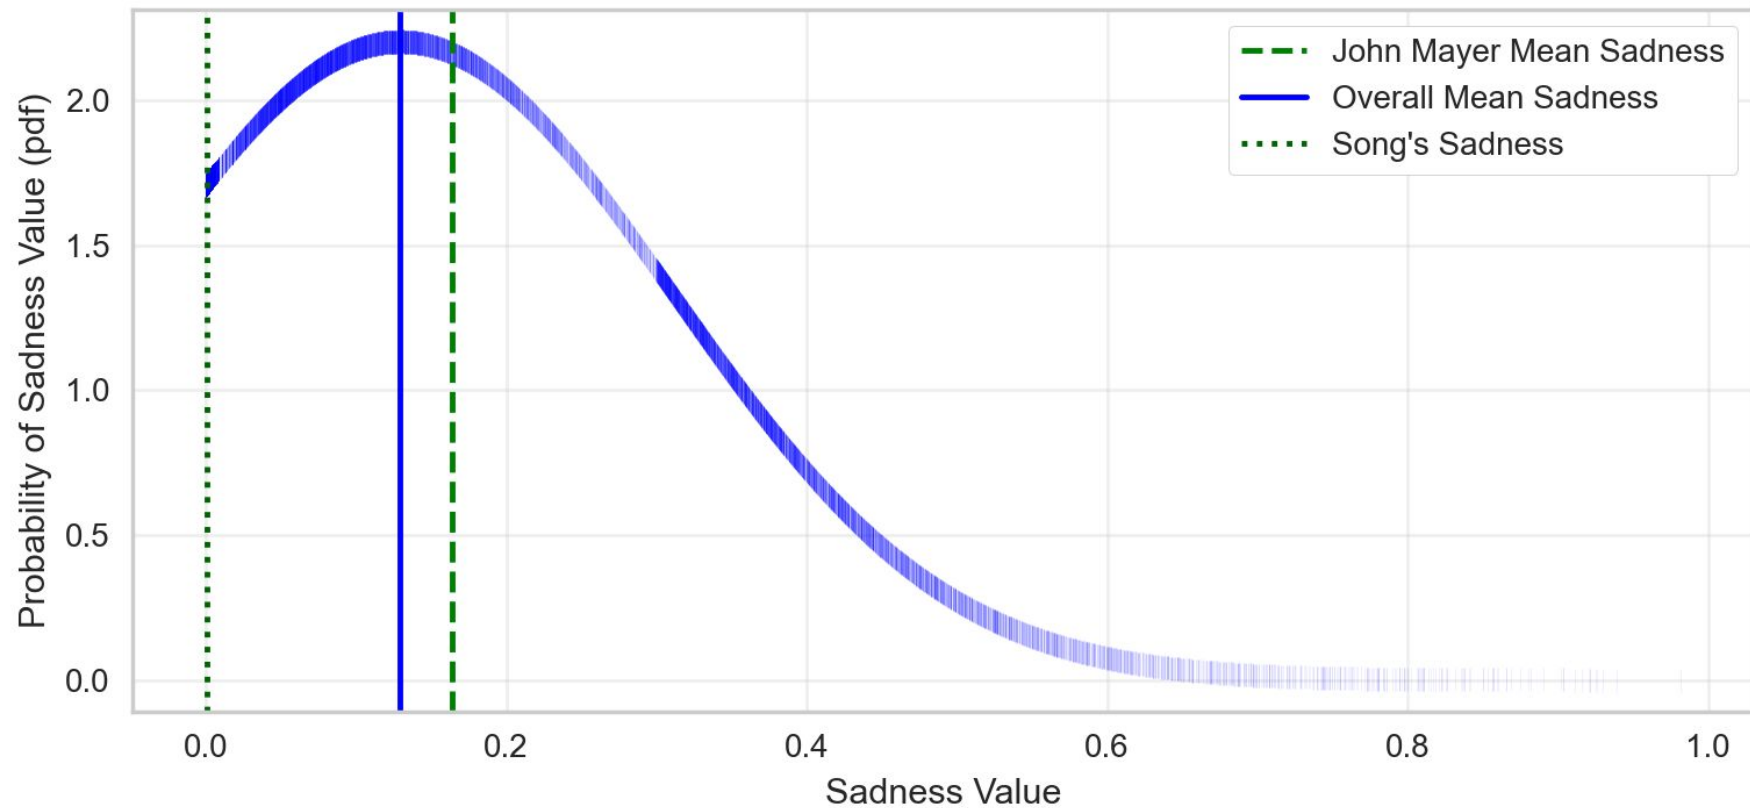

When Love Has Grown By George Benson

1973 - Jazz

Ram On By Paul McCartney

1971 - Rock

Distribution of Sadness Values

Future Work

- Make the recommender more customizable
- Add features to the predictions
- Create an “Explicit” filter
- Create a user interface
